

Matrix Effect

This is a great matrix game rendering effect. You can turn any of your 3D game objects into a data flow effect. And you can easily integrate it into your project. There are many configuration parameters that can be adjusted by yourself. It supports URP HDRP Built-In rendering pipeline.

Main Features:

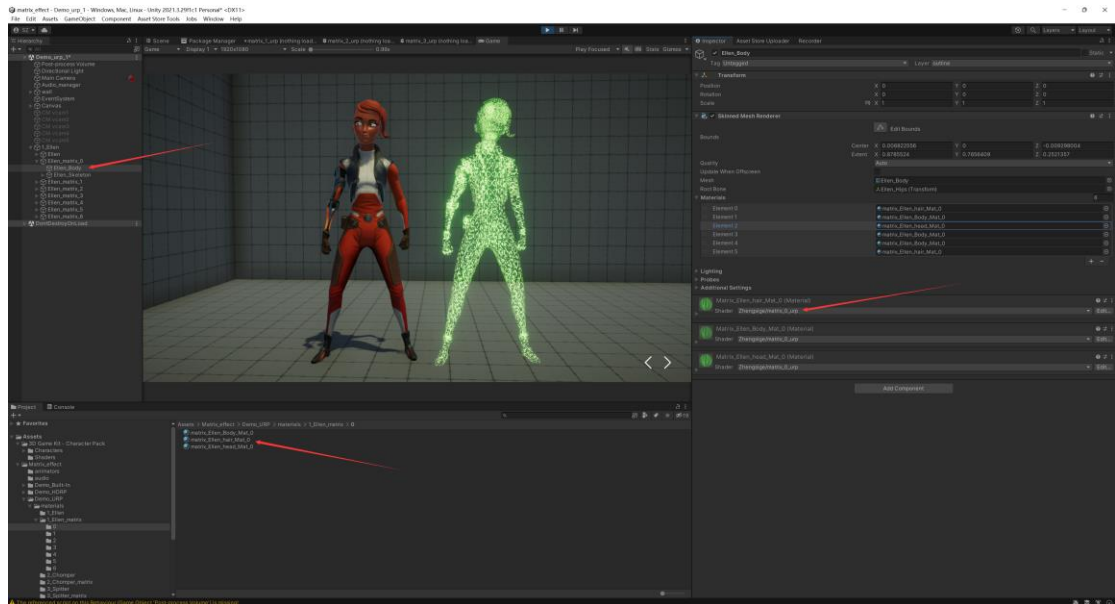

1. Very easy to integrate into your project, no need to write any shader and code.
2. **Support URP HDRP Built-In.**
3. Through the parameters exposed by the shader, you can easily adjust more effects.
4. Support Android, IOS, Windows and other platforms.
5. Clear demo.
6. Good support

Before running the Demo scene, you need to import another free asset in the unity asset store:

<https://assetstore.unity.com/packages/3d/3d-game-kit-character-pack-135217>

How to use it:

You just need to set the shader of your game object's material to "Zhengsiges/matrix". As shown below:
